

# RAINY DAYS

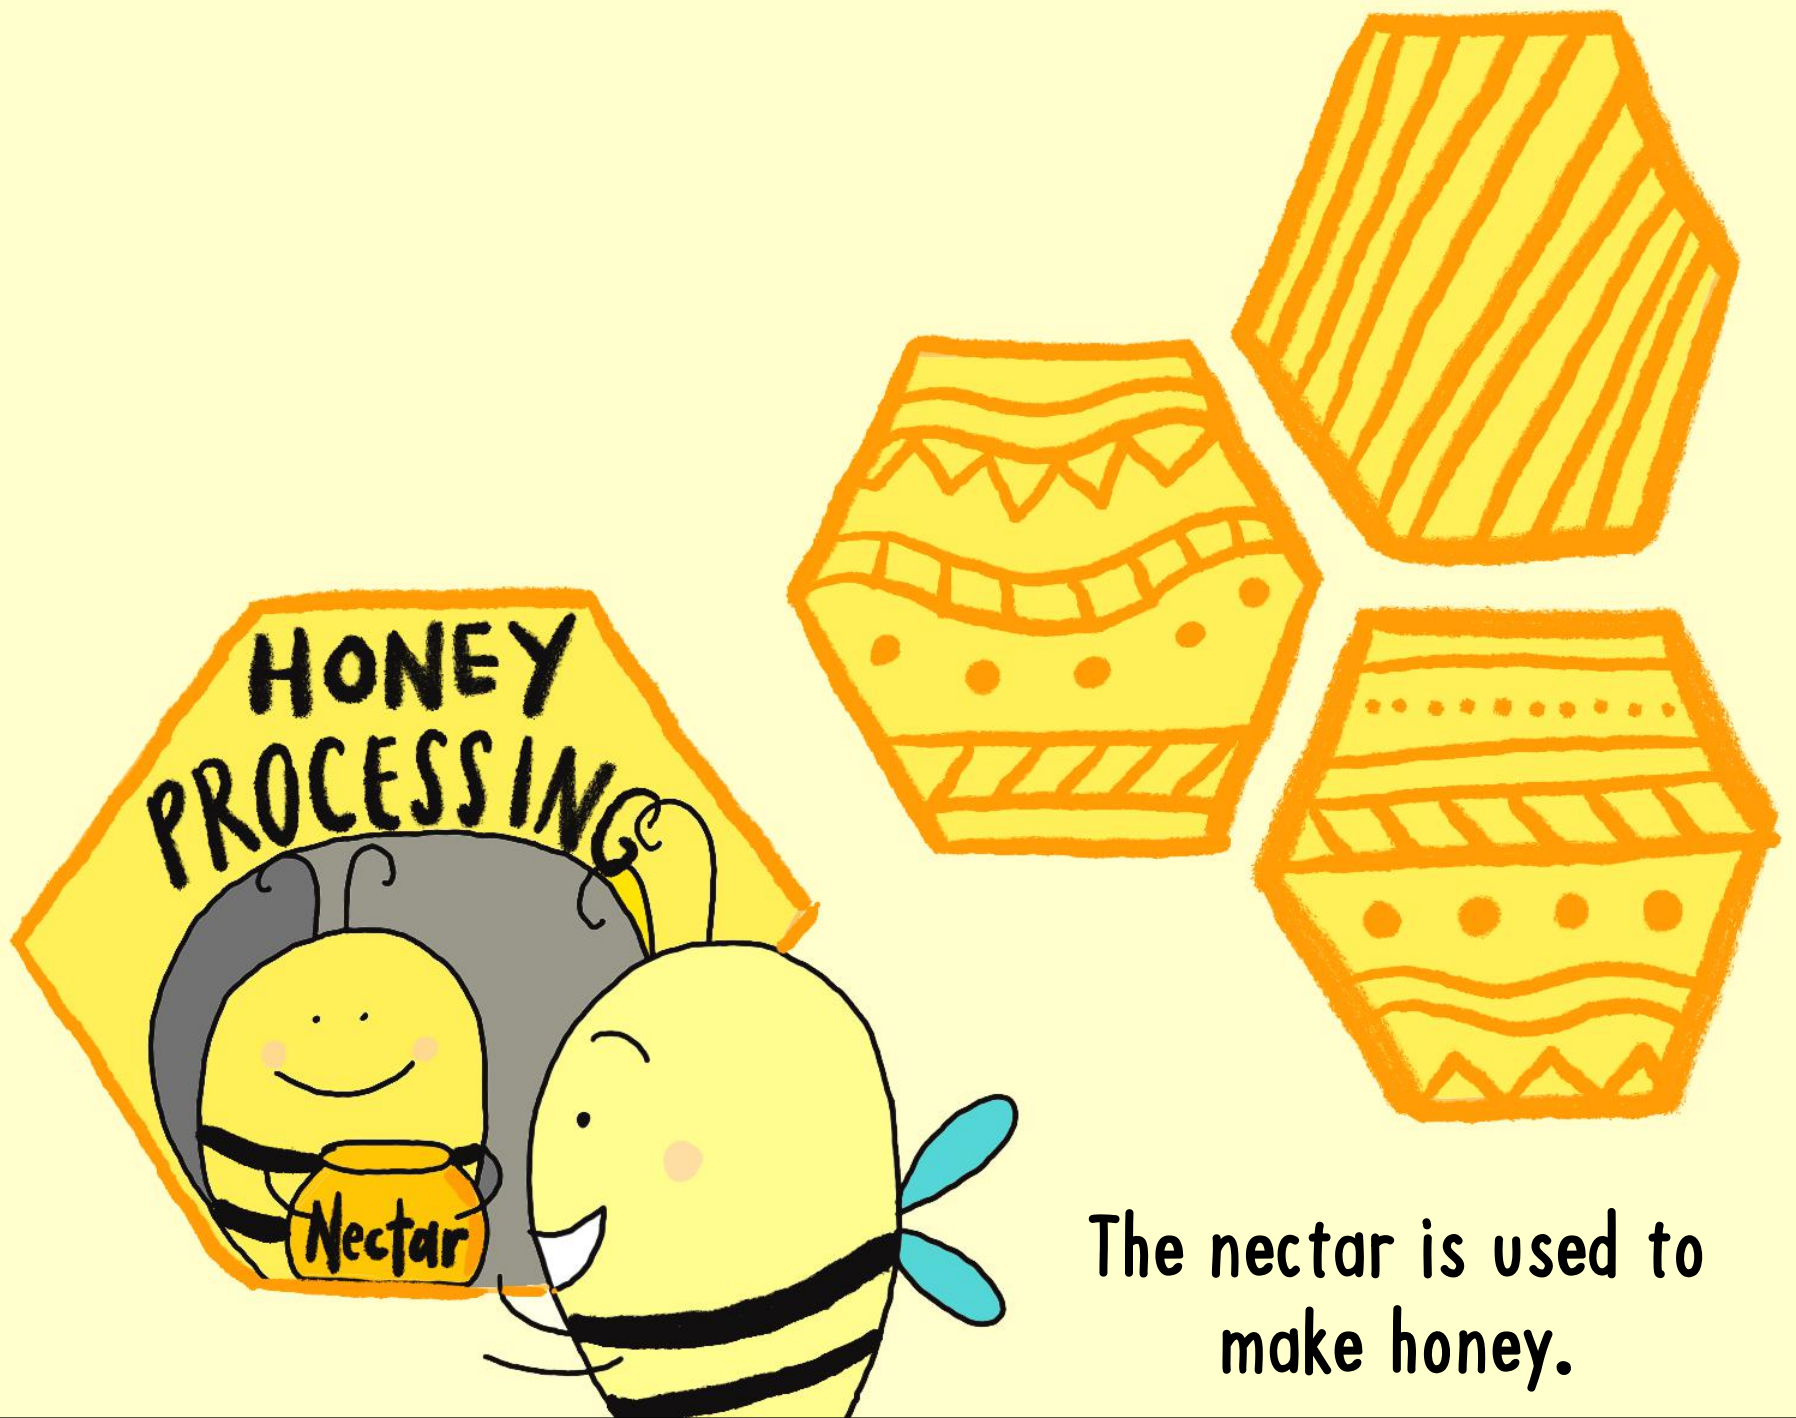

Written and illustrated by Yenee Khoo

Vee is a honey bee. He has an important job of collecting nectar from flowers.

Every day, Vee goes into fields and gardens, visiting beautiful flowers to collect nectar.

The nectar is used to make honey.

One day, it started to rain very heavily. Vee and all the other bees had to stay in the hive.

Monday

Wednesday

Tuesday

Thursday

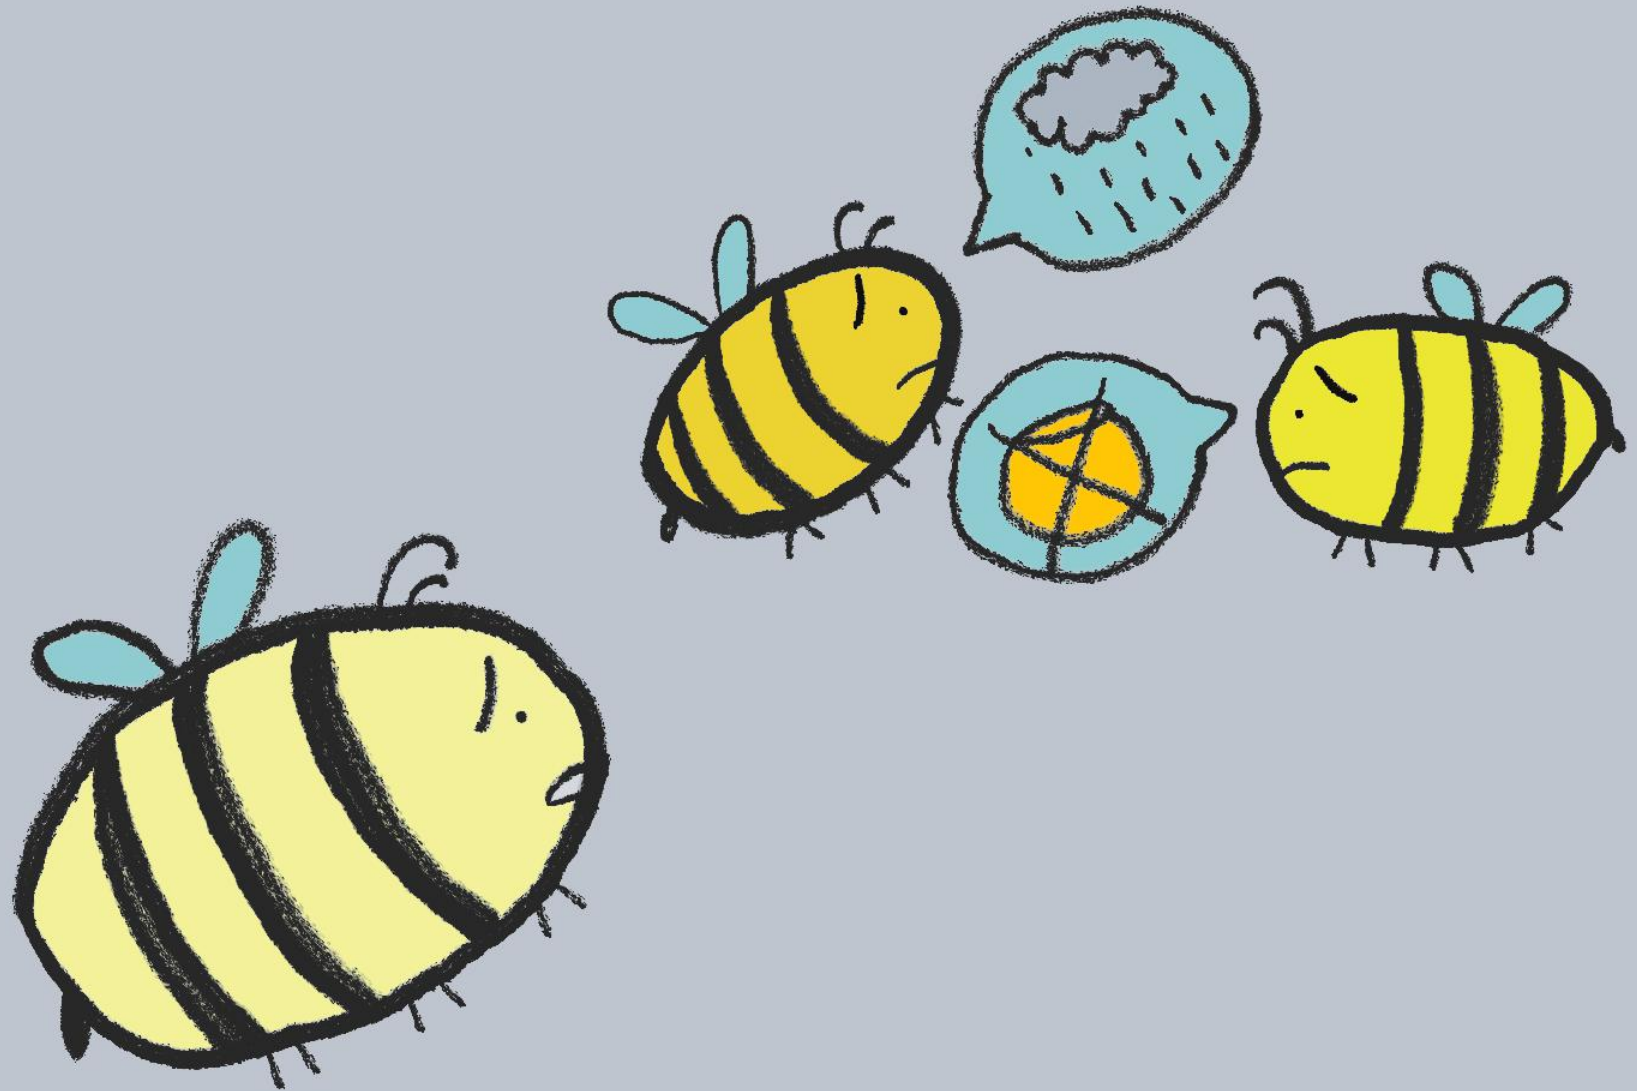

Saturday

It rained and  
rained for  
many days.

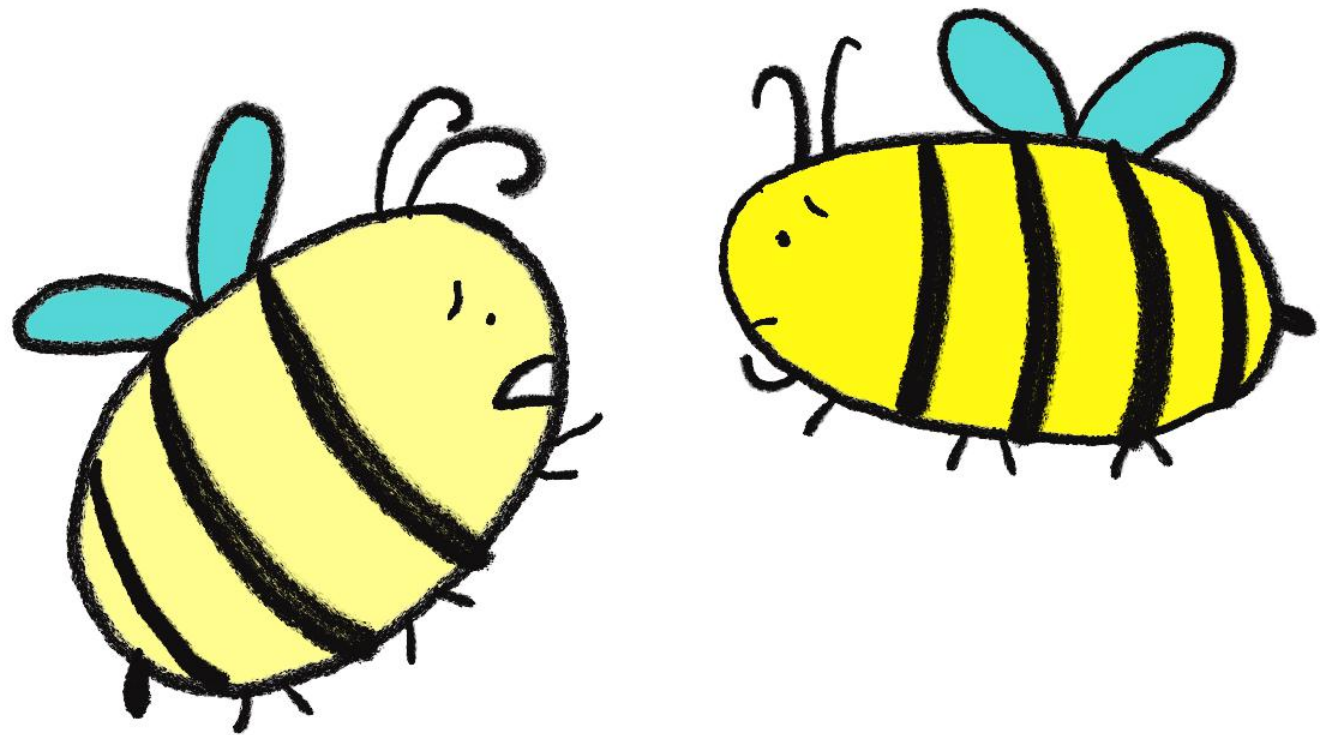

Friday

No one knew  
when the rain  
would stop.

Everyone was worried. Vee felt scared and worried, too. He did not like the change.

Vee talked to his friend, Zee, about how he felt.

## RAINY DAY PLAN

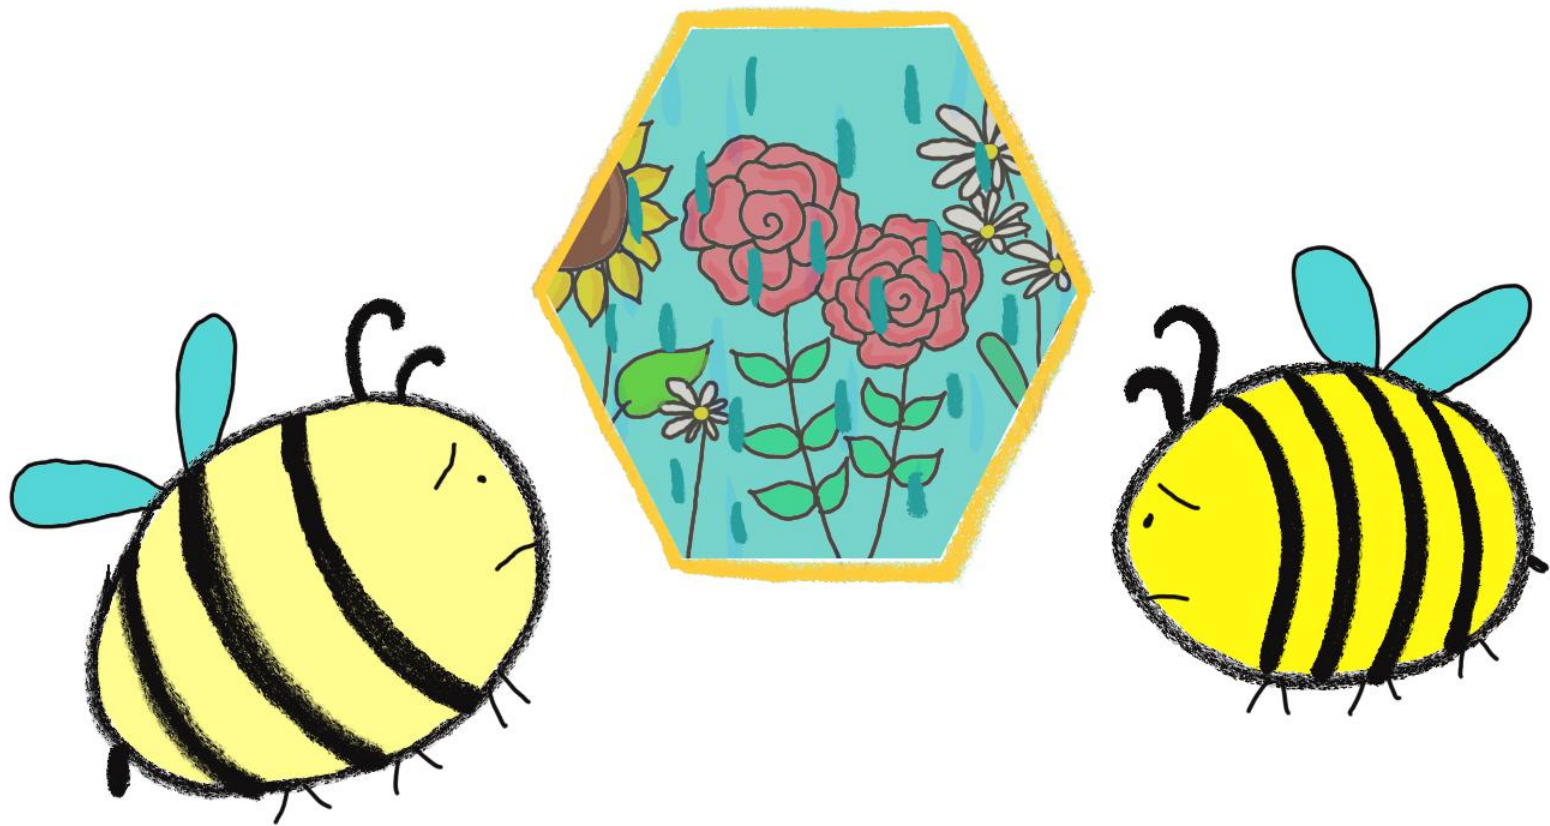

---

- ① Learn
- ② Play
- ③ Rest

Together, Vee  
and Zee came  
up with a  
RAINY DAY  
PLAN.

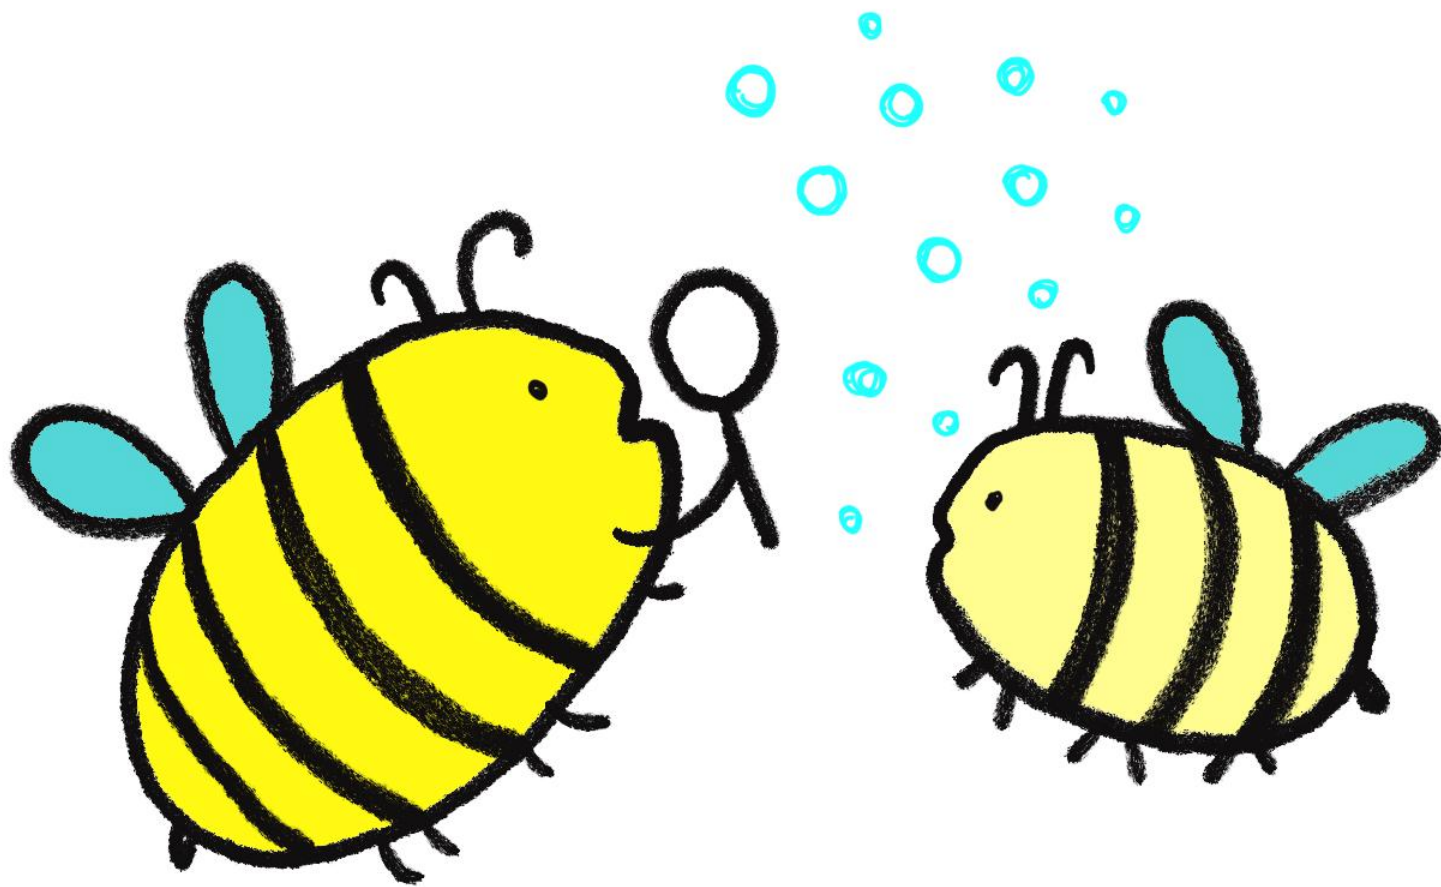

Vee and Zee read, played games, wrote letters to their friends, danced, drew and did other fun projects.

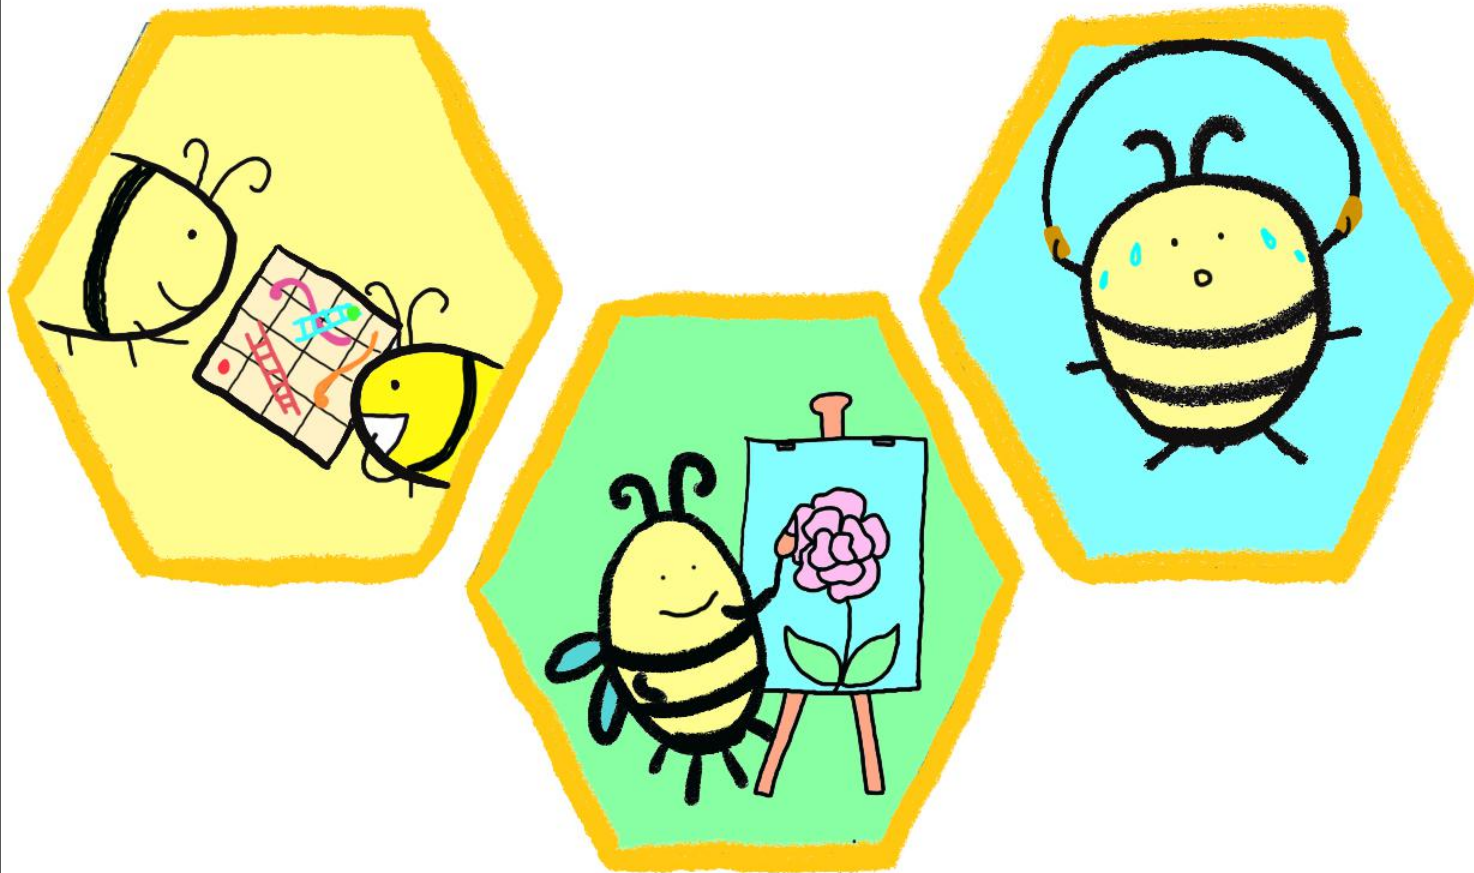

They still **REALLY** missed going out.

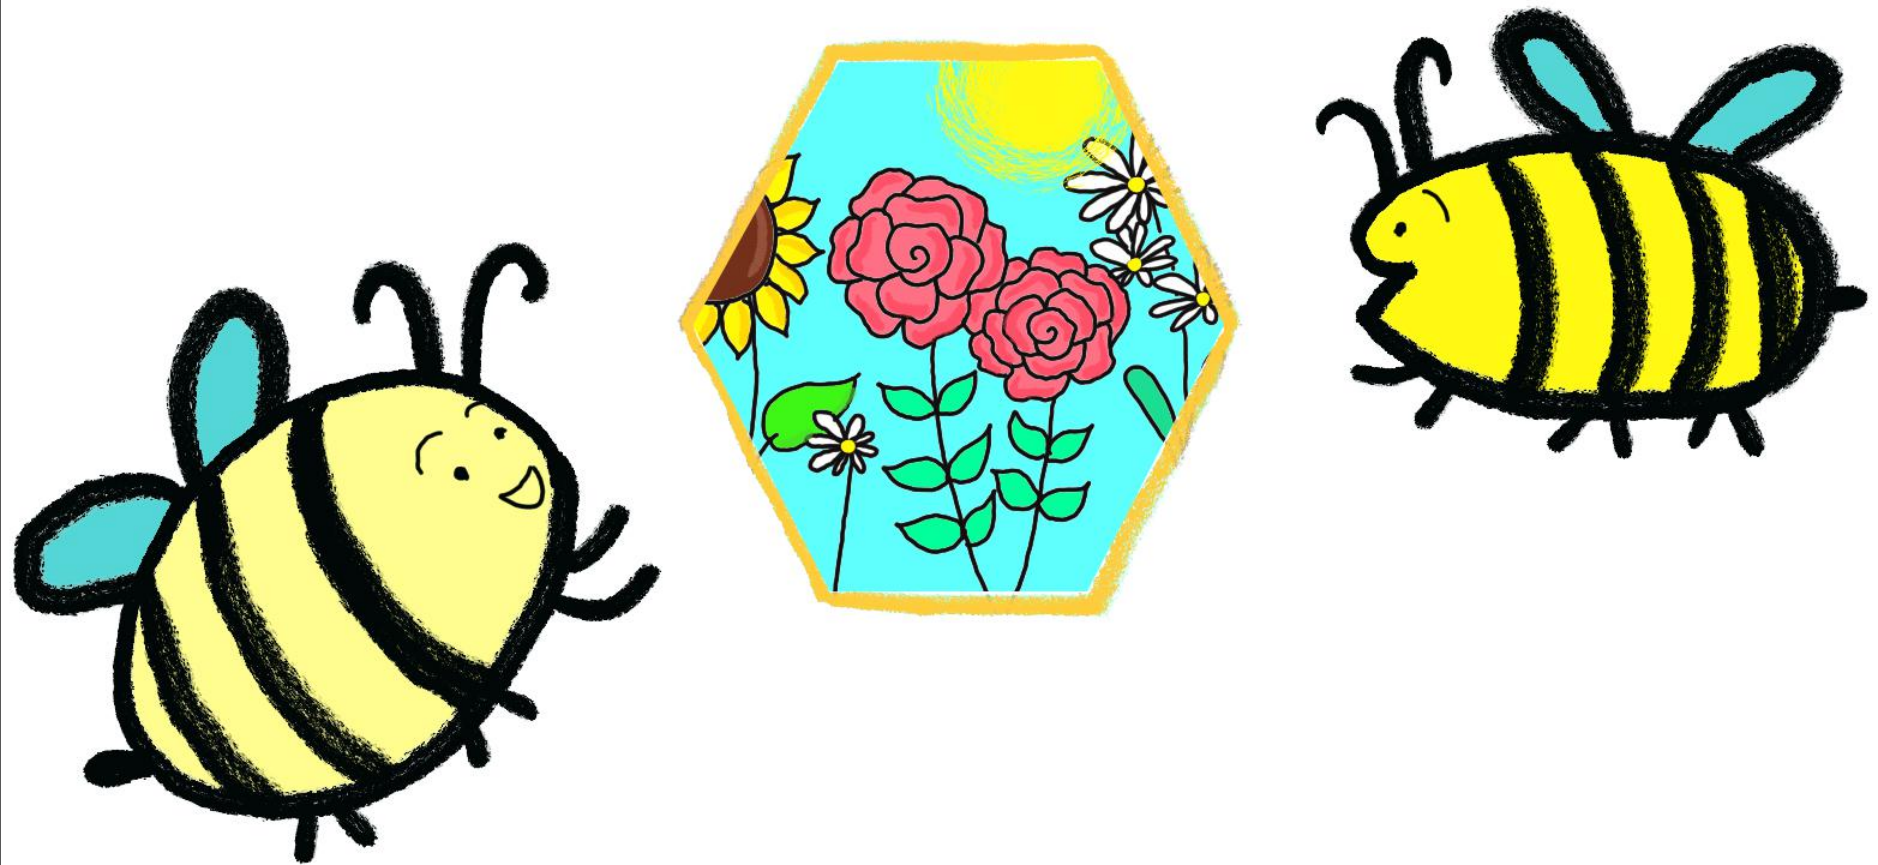

Some days, Vee did NOT feel like doing anything.  
At all.

When Vee got worried, Zee stayed with him and they  
blew bubbles together.

It rained for many days. Days and weeks slowly passed.

One day, the rain finally stopped. They could go out again!

Vee was thankful that he and his friends were safe.
